

**>95%**

of natural gas customers experience reliable service, even during devastating hurricanes.

**#1 safest**

form of energy transport according to the United States Department of Transportation.

**\$400k**  
invested annually in education and awareness of pipeline safety.

**\$10m**  
invested annually in our safety management system.

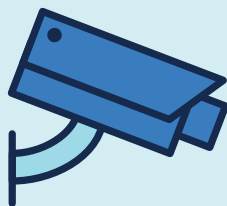

**Awarded**

the American Gas Association's Safety Achievement Award for Excellence in Employee Safety.

**Setting the standard**

at our innovative GasWorX facility for advanced safety and technical training across the gas industry in the southeast.

**Monitoring safety  
24/7/365**

State-of-the-art tech like our Gas Control Center and mobile command center allow us to efficiently monitor the natural gas system.

**Watching carefully**

Not only are we reducing current emissions, but we're also predicting and eliminating emissions before they happen. One of the ways we are doing this is with leak detection vehicles, which play a crucial role in leak surveys after storms, during emergencies and before special events.

**GPS barcoding**

As part of the Integrity Management Program, barcoding allows us to know exactly where underground assets are located for quicker response and control.

## 5 ways Peoples Gas is committed to safety

Investing heavily in training

Mitigating risks and incidents

Maintaining quality control

Exceeding government pipeline standards

Promoting pipeline safety awareness

### Delivered safe and secure

Peoples Gas has a proven record of delivering natural gas safely to homes and businesses across Florida. According to the United States Department of Transportation, the pipelines used by Peoples Gas are the #1 safest form of energy transport.

#### Legend

Interstate Pipelines Operator
